# Open vSwitches

Controlador: [REDACTED]

OVS	Ambiente	Redes do Filer	Outras redes
[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

**Check**

```
Check SDN on vSwitch [REDACTED] X
[12/12/2018 17:38:58] Check ok
[12/12/2018 17:38:58]

Globo SDN Client Statistics

Status: RUNNING

Controller: [REDACTED]
Is connected: True
Fail Mode: secure
Datapath id: [REDACTED]
Manager: tcp:[REDACTED]:6640

NetworkAPI flows: 3611
Static flows: 18
NetworkAPI + Static flows: 3629
Controller flows: 6
Total flows: 3635

Execution complete
```

```
[root@blctrj021c02 ~]# yum
```

```
~]# gsdn --help
```

## Globo SDN Client

Client script that configures and manages the Globo Software Defined Networking environment.

Usage: `/usr/sbin/gsdn` [options] command

### Options:

<code>-h, --help</code>	Prints the help message
<code>-v, --verbose</code>	Increases the script verbosity
<code>-c, --config</code>	Inform the configuration file path
<code>-v, --version</code>	Show gsdn version

### Commands:

<code>all_flows</code>	Show total flows
<code>check_allowall_flow</code>	Checks if the allow_all flow is still enabled
<code>controller_probe</code>	Checks if the probe to controller is OK
<code>datapath_id</code>	Prints the vSwitch datapath ID
<code>del_allow_all</code>	Removes the temporary allow_all flow
<code>disable</code>	Disables SDN at the local machine
<code>dump</code>	Dumps the vSwitch flow table
<code>enable</code>	Enables SDN on vSwitch through OpenVSwitch
<code>get_controller</code>	Gets remote controller
<code>get_fail_mode</code>	Gets the current vSwitch fail mode
<code>get_manager</code>	Gets remote manager in use
<code>napi_flows</code>	Show total flows from Network API
<code>napiandclient_flows</code>	Sum of static and Network API flows
<code>odl_flows</code>	Show total flows from remote controller
<code>sdnclient_flows</code>	Show total static flows
<code>show-tech</code>	Show statistics of the SDN. Good for debugging
<code>status</code>	Show the status of the SDN environment locally

### Authors:

Made by Globo.com Telecom team <suptel@corp.globo.com>
