

# Cisco TrustSec

Software Defined Segmentation  
Segurança e Mobilidade

Wilson Rogério Lopes

GTS 27

05/2016

# Cisco TrustSec

- Segregação e controle de acesso, independente de ip e vlan
- Security Group Policies
  - Usuários ou dispositivos são classificados e associados à um Security Group, identificados por um Security Group Tag
- Administração e distribuição centralizada das políticas

## ISE – Identity Services Engine

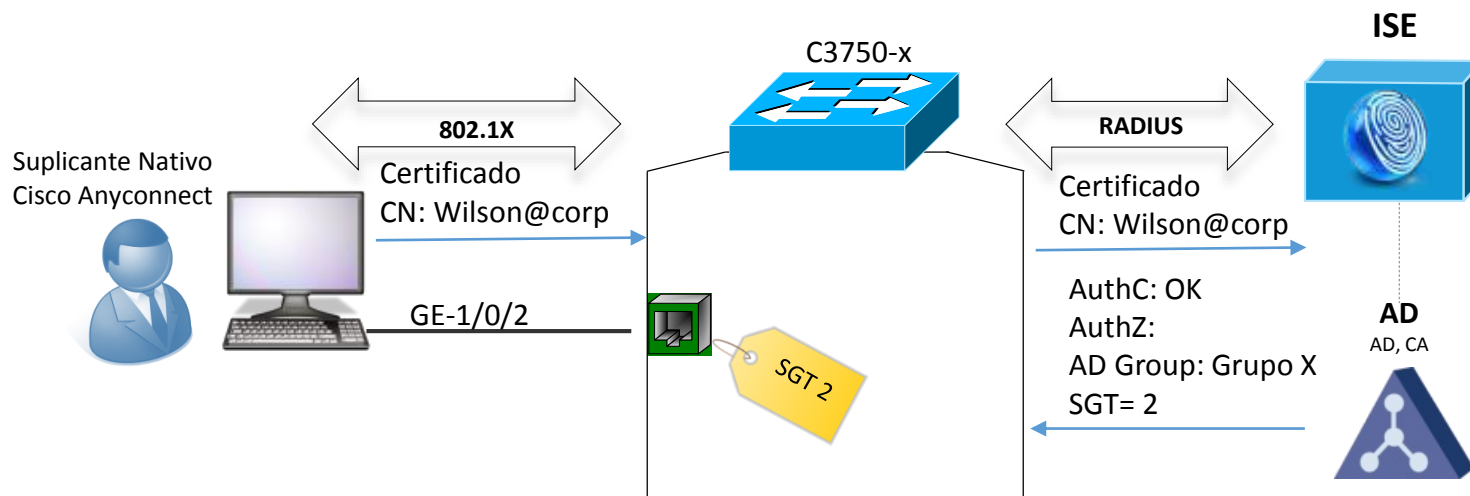

AD, LDAP

- . Radius Server
- . Políticas Centralizadas
- . AAA Services
- . Verificação de postura
- . Profiling de dispositivos
- . Monitoração
- . Relatórios

# SGT – Security Group Tag

- 16 bits = 65536 SGTs possíveis
- TAG inserido no frame ethernet na entrada da rede
- Associação dinâmica – 802.1x, MAB, Profiling

# SGT – Security Group Tag

- Associação Estática
  - IP to SGT

DEV/Homolog Servers SGT 10	ERP Servers SGT 20	Mail Servers SGT 30	Proxy Servers SGT 40
10.200.0.10	10.100.0.10	10.101.0.10	10.200.0.10
10.20.0.11	10.100.0.11	10.101.0.11	10.200.0.11
10.10.0.10	10.50.0.10	10.60.0.10	

\* Associação de SGT requer suporte em hardware

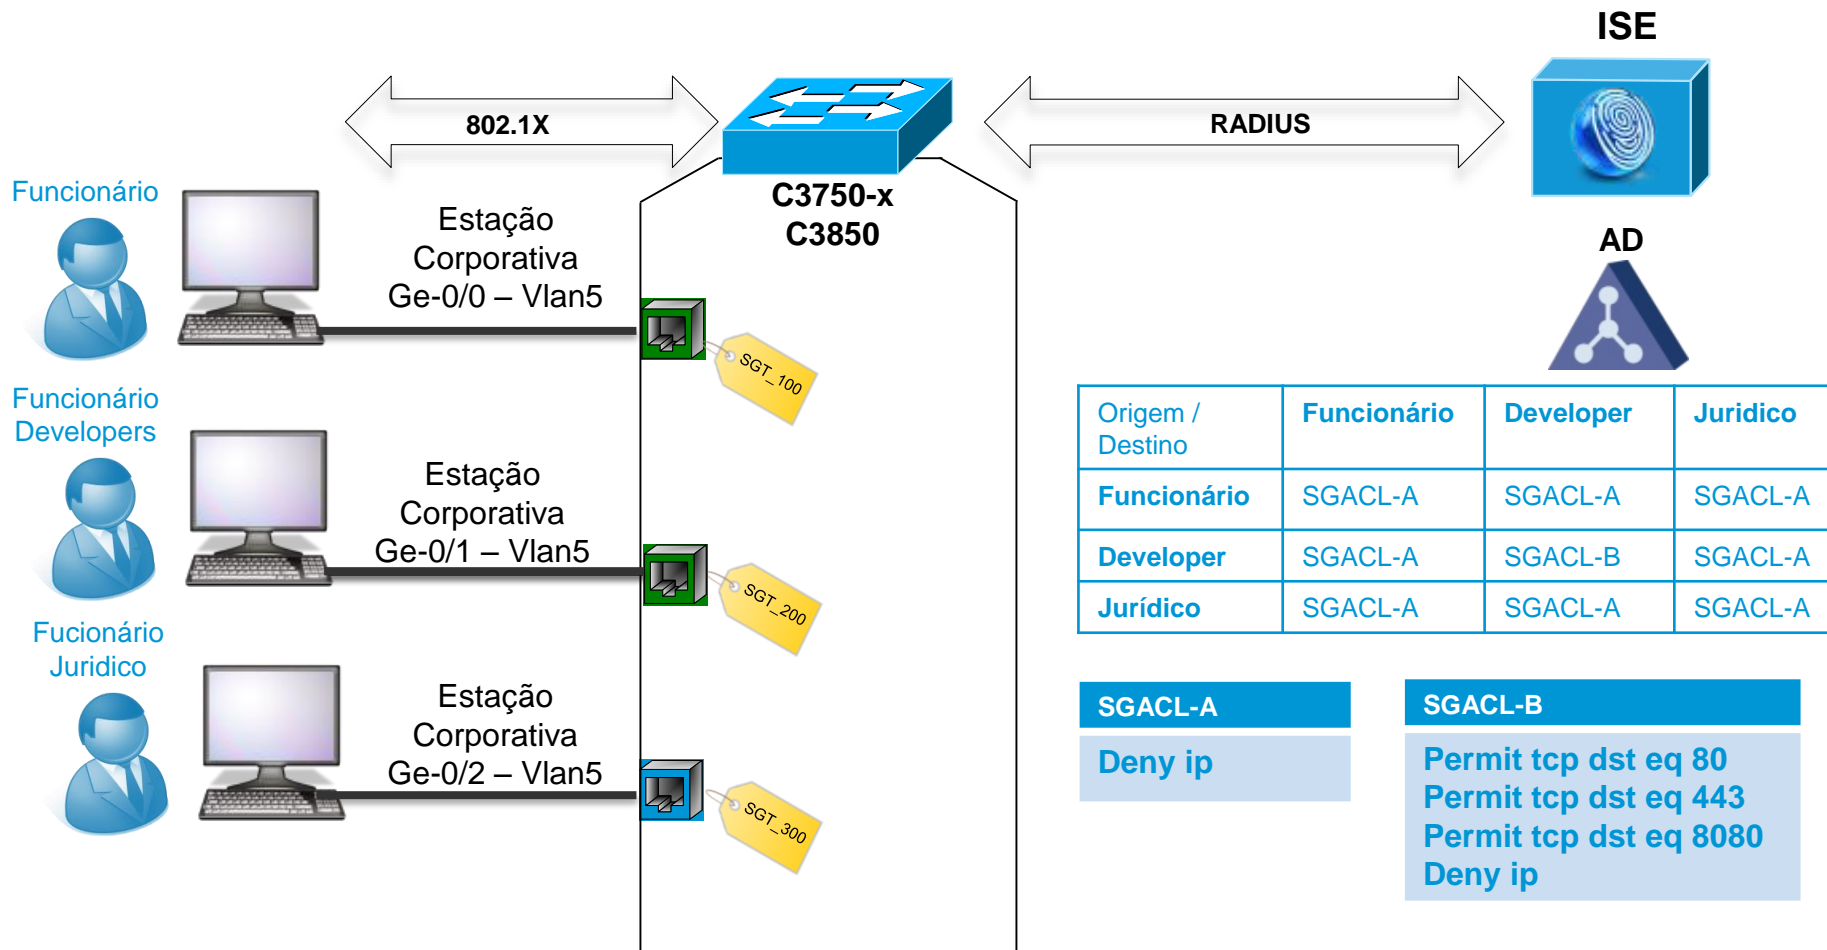

# SGACL – Security Group ACL

- ACL baseada em SGT de origem x SGT de destino
- Matriz de acesso
- Default permit
